About

Master's Computer Science student (University of Passau) seeking a working-student role in IT application management, process automation and business applications. Experience automating build/test/deployment, integrating external systems, monitoring running services and stabilising end-to-end data flows, in Agile teams using Jira and Confluence.

Skills

Automation & Integration: Automation workflows, system integration, REST APIs, OAuth 2.0, JWT; CI/CD, GitHub Actions, Docker; monitoring, debugging and troubleshooting

Languages: Python, SQL, Java, TypeScript, C++, PHP

Data: PostgreSQL, MySQL, SQL Server, MongoDB, Firebase, NoSQL; Data Preprocessing

Tools & Practices: Git, Jira, ClickUp, Confluence; Agile, Scrum; Unit Testing, Integration Testing; Kubernetes, AWS (coursework)

Also: Microservices, Spring Boot, Django, Flask, ExpressJS; Generative AI tooling (GitHub Copilot, Cursor); React Capacitor

Languages: English (C1), German (B1), French (B2), Arabic

Professional Experience

Backend Developer MyOnCare Munich, Germany 05/2026 – present

- Developed backend integrations that securely connect patients' wearable health devices (e.g. glucose monitors, activity trackers; providers such as Abbott LibreView, Withings and Corsano) to the company's digital health platform.
- Debugged and stabilised the full data flow, from external device providers to the platform database, using Git, Docker, code reviews, and automated tests.
- Implemented secure user authorization (OAuth 2.0), consent handling, and account connect/disconnect flows in a multi-tenant health platform.
- Built and maintained REST APIs and microservices to import, process, and store health measurements; analysed end-to-end data flows from external providers to the database to improve reliability and traceability.

Software Engineer Intern Omnilink Tunis, Tunisia 06/2024 – 10/2024

- Set up and maintained CI/CD pipelines (GitHub Actions) to automate build, test, and deployment steps and reduce manual release work.
- Contributed to testing and monitoring of running services to catch regressions early and keep deployments stable.
- Built and integrated backend REST APIs and helped manage data flow between microservices in a production environment.
- Used Git-based workflows, code reviews, and Agile collaboration; quickly learned new DevOps tools and concepts.

AI Engineer Intern Finspot Finance Consultancy Sousse, Tunisia 05/2023 – 09/2023

- Built secure backend services for financial data processing and document-driven automation workflows.
- Designed REST endpoints and data handling so extracted records could be stored and reused reliably across downstream services.

Projects

- **Well-Being App** (academic project, 01/2024 – 05/2024): microservices in Flask, Spring Boot and Flutter with an LLM-based chatbot, tested with about 50 users.
- **CI/CD Pipeline Lab** (personal project, see portfolio): hands-on lab on automated build, test and deployment pipelines.

Education

M.Sc. Computer Science	University of Passau, Germany	10/2024 – Present
ICT Engineering Degree	Higher School of Communication of Tunis (SUPCOM)	09/2022 – 06/2024
Pre-Engineering Degree	Monastir Preparatory Engineering Institute, Tunisia	09/2020 – 06/2022

Certifications & Training

AWS Solutions Architect Associate (course)	KodeKloud	09/2026
AWS Cloud Practitioner (course)	KodeKloud	2026
